17:00 – 19:00

Korea Standard Time

Green Buildings – Reducing Impact, Enhancing Wellbeing

Overview

Buildings account for a substantial proportion of global GHG emissions which is expected to increase with growing demand for buildings, particularly from rapidly urbanizing developing countries. GGGI works across the building life cycle to leverage strategic entry points to reduce resource intensity of buildings while enhancing the wellbeing of occupants. The aim of this event is to generate momentum in the building sectors among GGGI Members towards Greener Buildings through showcasing results from GGGI green building projects.

Agenda (Provisional)

* Times in Korea Standard Time

- | | |
