

GGGI Green and Resilient Recovery

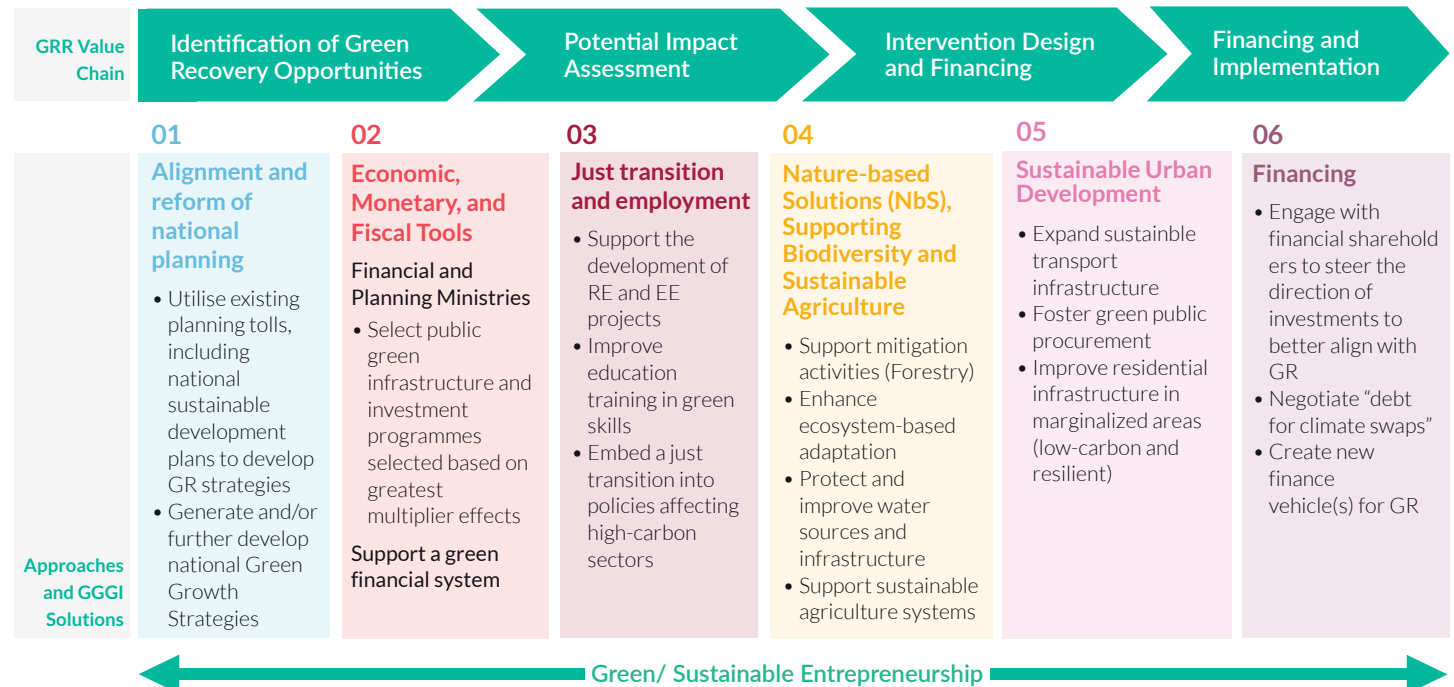

Green and Resilient Recovery Key to Achieving Green Growth

GGGI is supporting Members and partner countries Green Deals

More ambitious mitigation and adaptation commitments are needed in order to meet the Paris Agreement goals. At the same time, the recession caused by the COVID-19 pandemic could slow down investments in the required transitions to inclusive, low-carbon and resilient development pathways. GGGI is working with Member and partner countries on Green and Resilient Recovery (GRR), bringing the need for economic growth and employment together with investments in green sectors in alignment with Nationally Determined Contributions (NDCs) and Sustainable Development Goals (SDGs).

Six Main Approaches for a Green and Resilient Recovery

In partnership with Members and peers, GGGI has developed a flexible model and service offering to stimulate Green and Resilient Recovery based on international best practices and insights.¹

GGGI Technical Report *Achieving Green Growth and Climate Action Post-COVID-19* (2020, July).

GGGI Technical Report *Post-COVID-19 Green Recovery Report Summary: Recommendations to Green Mexico's Recovery at the Subnational Level* (2021, March).

Green Recovery is central to the GGGI Strategic Framework and Work Plan

GGGI has created an Addendum to its 2030 Strategy to reflect the importance of Green and Resilient Recovery in the coming decade. Through its 2021-2022 work program, the GGGI Green and Resilient Recovery program seeks to maximize green jobs creation and speed-up inclusive development while targeting the most adversely affected economic sectors, as illustrated by:

- Cambodia: sustainable energy practice for the garment sector
- Myanmar, Tonga, Ethiopia, Burkina Faso: Long-Term Low Emissions Development Strategies (LT-LEDS)
- Philippines: sustainable agribusiness development for micro enterprises on export commodities
- Uzbekistan: green recovery investment plan for Karakalpakstan
- Viet Nam: green business development for SMEs and start-ups through the SME Development Fund

Additionally, in 2020-21, through the funding agreement with Qatar Fund for Development, GGGI supports climate resilience and green COVID-19 recovery for the Caribbean, Kiribati, Pacific, and other SIDS and LDC countries in the areas of green entrepreneurship, climate smart agriculture, and solar irrigation.

GGGI Technical Capacity and Services

GGGI's Climate Action and Inclusive Development Unit provides (i) analytic services and advisory on green recovery; ii) national and subnational planning for green recovery; and (iii) support to mobilizing finance for green recovery projects with high potential for green jobs creation, primarily in renewable energy, clean transport, nature-based solutions, sustainable agriculture, and forestry development.

GGGI Program for Green and Resilient Recovery

GGGI is supporting **13 of its member countries with their plans and projects to green the recovery and develop their own Green New Deals** (2021).

	National Planning	Economic, Monetary and Fiscal Tools	Just Transition/ Employment	NbS, Biodiversity, Agri	Sustainable Urban Development	Financing
Asia and the Pacific						
 Fiji Green Tourism Recovery		✓				
 Lao PDR Resilient Recovery Rapid Readiness Support					✓	
 Mongolia Green Jobs from RE			✓			
Africa and Europe						
 Burkina Faso Greening National 5-yr Plan	✓					
 Cote d'Ivoire Green Recovery	✓			✓	✓	
 Rwanda Green Jobs Affordable Housing					✓	
 Senegal Green Recovery Sustainable Landscapes				✓		
 Uganda NDCP Economic Advisory Support	✓					✓
 Hungary Co-benefits of Green New Deal	✓		✓			
Latin America and Caribbean						
 Colombia "Post-Coal" Green Jobs Strategy			✓			
 Mexico Subnational Green Recovery		✓	✓			✓
 OECS Assess Greening of Recovery	✓			✓		
 Peru Green New Deal	✓		✓			

GGGI supports 38 Members to deliver on the Sustainable Development Goals and the Nationally Determined Contributions to the Paris Agreement.

Based in Seoul, Republic of Korea, GGGI is a treaty-based international, inter-governmental organization that supports country governments transition to a model of economic growth that is environmentally sustainable and socially inclusive. GGGI has a unique in-country presence and prominent role as a neutral, trusted advisor and strategic development partner embedded in Member and partner governments. These advisors are directly engaged with national governments in setting the strategic direction for national program development guided by a Country Planning Framework with the Government. GGGI's operating model maximizes the potential to translate green growth strategies and policies (especially economic policies) into green investment plans, mobilizing green finance commitments needed to bolster support for low-carbon and climate-resilient economic development and strong institutional capacity development. GGGI's operations are overseen by a Council, chaired by the former Secretary-General of the United Nations Mr. Ban Ki-moon, which comprised GGGI's members and non-state actors.

Global Operational Priorities and Programmatic Solutions

1 Catalyzing and accelerating access to climate finance/green investments for GGGI's Members' public and private sectors

- Green Investments (green bankable projects, National Financing Vehicles (NFVs), green and climate instruments, carbon-focused engagements)

2 Supporting GGGI's Members in strengthening policy planning, regulatory frameworks, and institutional capacity to achieve green growth outcomes

- Climate Action (inclusive green growth plans, long-term low emissions development strategies (LT-LEDS), NDC support, monitoring, reporting, and verification (MRV) system design, climate diplomacy)

3 Achieving a sustainable and circular bioeconomy while securing healthy natural systems

- Climate Resilient Agriculture (solar irrigation, renewable energy application in agri value chain, resilient cropping practices, resource conservation)
- Sustainable Forests (REDD+, landscapes financing mechanisms, natural capital markets innovations)
- Coastal Resilience (mangroves as ecosystem for livelihoods, aquaculture, marine issues - fisheries, flood protection and pollution)

4 Making cities and communities sustainable, livable and resilient, supported through green jobs, services and green infrastructure capital markets innovations

- Waste Management (circular economies, urban and agricultural waste, wastewater, Fecal sludge management (FSM), waste to resource)
- Sustainable Mobility (e-mobility, non-motorized transport)
- Green Buildings (green urban infrastructure norms/standards/policies, energy efficiency in residential & commercial buildings)
- Solar PV (energy transition access and productive use - solar water pumping, solar PV auctions, rooftop, utility scale plants, storage)
- Green Industries (green industrial parks, green supply chains, energy efficiency in SMEs, labeling and standards)

5 Accelerating progress in GGGI's country programs for poverty eradication and gender equality through the organization's operations

- Cross cutting in all programmatic solutions
