

# PACIFIC REGIONAL PROGRAM

Global Green Growth Institute

## Country programs in Pacific as of December 2024

Cook Islands

Federated States of Micronesia

Fiji

Kiribati

Marshall Islands

Nauru

Niue

Papua New Guinea

Solomon Islands

Tonga

Tuvalu

Palau

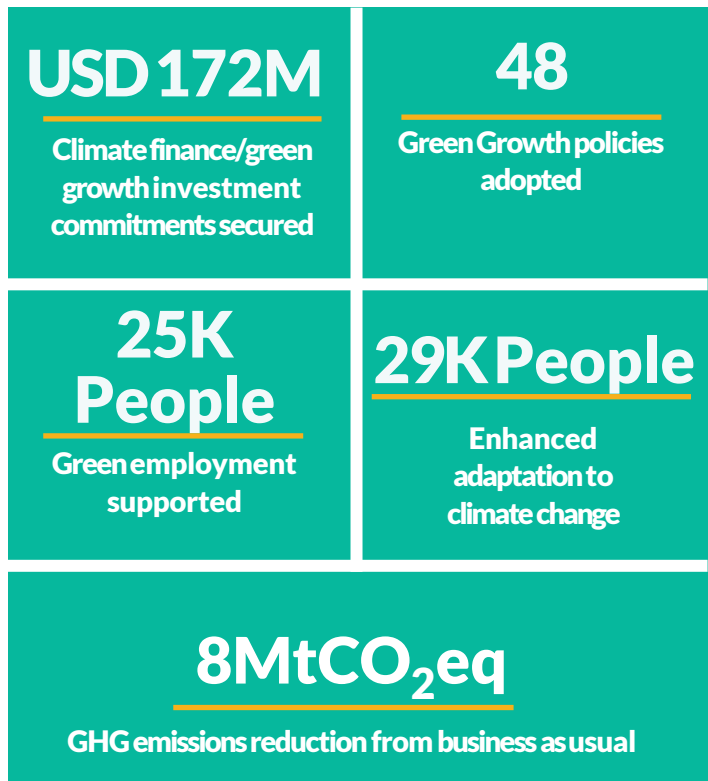

Vanuatu

## WHAT WE DO

The Global Green Growth Institute's (GGGI) objectives in the region is to support Pacific Island Developing States (SIDS) to sustainably achieve national development goals and Paris Agreement commitments by developing strategic frameworks and mobilizing finance to reduce greenhouse gas emission, create green jobs, increase access to sustainable services and enhance resilience to climate change.

## GGGI IN PACIFIC

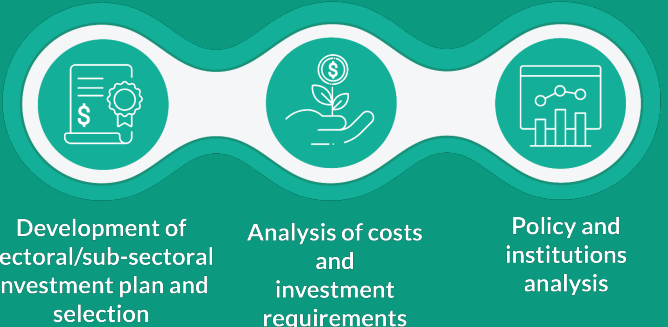

\*2018-2024 achievements

## GGGI VALUE CHAIN

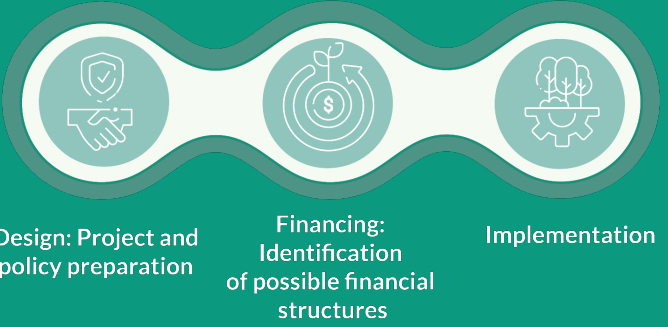

### Green impact assessment

### Sector/Sub-sector strategy & planning

### Design, financing & implementation

## OUR COLLECTIVE JOURNEY

GGGI has been active in the Pacific since 2015, promoting green growth planning and mobilizing climate finance for resilient and inclusive investments. GGGI operates full country programs in Fiji, Kiribati, Papua New Guinea, Tonga, and Vanuatu, has operations in Solomon Islands, Samoa and Tuvalu, and supports all 14 Pacific Island Countries (PICs) through regional initiatives.

At the regional level, GGGI focuses on adaptation, renewable energy, low carbon development, climate resilience, and mobilizing climate finance and implementation in the Pacific.

GGGI works closely with Pacific governments, acting as a trusted advisor, and partners with donors and regional institutions to secure financing for projects.

# HIGHLIGHTED PROJECTS

## Small Island Developing States Climate Action Program (SIDS-CAP)

**Countries:** Cook Islands, Fiji, Kiribati, Marshall Islands, Micronesia, Nauru, Niue, Palau, Tonga, Tuvalu, Samoa  
Papua New Guinea, Solomon Islands, Vanuatu

The SIDS Climate Action Program (SIDS-CAP) is a 5-year partnership between Global Green Growth Institute (GGGI) and the Government of the Grand Duchy of Luxembourg for an innovative programmatic approach which enables the integration of GGGI's technical assistance across the Pacific and Caribbean regions, bringing synergies of different country programs and action. Implementation of the Small Islands Developing States Climate Action Program (SIDS-CAP) support climate change mitigation, adaptation, cross-cutting and loss and damage actions in 20 GGGI SIDS member and partner countries in the Pacific and Caribbean (14 Pacific Island Countries and six Eastern Caribbean countries). Through the program GGGI implements a broad portfolio of regional and country-level projects aligned with country national climate change objectives and the Luxembourg International Climate Finance Strategy (ICF).

## Climate Finance Access, Absorption and Implementation in the Pacific

**Countries:** Fiji, Kiribati, Papua New Guinea, Samoa, Solomon Islands, Tonga, Vanuatu

This regional program aims to increase PIC's resilient and adaptive capacity to climate change and reduce its CO<sub>2</sub> emissions, in line with National Adaptations Plans (NAPs) and Nationally Determined Contributions (NDCs). This will be achieved through enhanced capacity and institutional capability to improve access to climate finance and strengthen their absorptive capacity for efficient delivery of impactful climate change programmes.

The programme's main modality of implementation is the hiring and embedding of Climate Finance Technical Advisors in seven target countries, namely Fiji, Kiribati, Papua New Guinea (PNG), Samoa, Solomon Island, Tonga, and Vanuatu, as well as delivery of scoping studies for mechanisms to enhance access and effective absorption and implementation of climate finance.

## Strengthening Access to Climate Finance in the Pacific through the Climate Finance Access Network

**Countries:** Fiji, Kiribati, Papua New Guinea, Samoa, Solomon Islands, Tonga, Tuvalu, Vanuatu

The project aims to support eight countries in the Pacific namely Fiji, Kiribati, Papua New Guinea, Samoa, Solomon Islands, Tonga, Tuvalu and Vanuatu in enhancing access to climate finance from a blend of public and private sources by strategically employing and embedding climate finance advisors within the government ministries. These advisors work closely with government counterparts and stakeholders to design, consult, develop, and submit concept notes and full proposals. The Project also supports feasibility studies to progress investment pipeline projects, and capacity-building for civil servants, including knowledge-sharing dialogues.
